ENGLISH HOLLY
(*Ilex aquifolia*)

For over fifty years we have grown English Holly on the shores of Lake Washington near Seattle. From the choicest of thousands of specimens we have propagated only stock that has proven through the years to have outstanding qualities and beauty. They have the glossiest of leaves and the brightest of red berries.

We offer limited quantities of strong well-rooted trees, balled and burlapped, to be shipped in accordance with your instructions. Prices are F.O.B. Seattle.
